

Hello folks,

ALSO WORTH NOTING

- **Subquadratic** -- **MIT Technology Review** reports the startup is now sharing more technical evidence behind its claim that it overcame a long-standing **LLM** mathematical bottleneck, which could matter if it translates into more scalable training or inference beyond current transformer limits, though the snippet still leaves key details uncertain. [source](#)
- **Baseten** -- **TechCrunch** says the AI inference startup is reportedly nearing a **\$1.5B** raise, a sign that serving and deployment infrastructure remains strategically important as demand for production-scale model inference accelerates. [source](#)
