

Hello folks,

--- SECTION 3: ALSO WORTH NOTING ---

- **LiquidAI / Hugging Face** -- LFM2.5-DSpark achieves up to 3.2x faster inference, a solid engineering result for deployment-constrained settings. [link](#)
- **Apple ML Research** -- Proposes lexical interventions for cross-lingual knowledge transfer when target-language data is scarce, relevant for building scientific NLP tools in low-resource languages. [link](#)
- **Apple ML Research** -- Derives scaling laws for mixture pretraining under data constraints, directly applicable to mixing scarce domain-specific scientific data with general corpora. [link](#)
- **Apple ML Research** -- Analyzes the theoretical complexity of evaluating Boolean query DAGs over inverted indices, with implications for neuro-symbolic reasoning pipelines that AI agents increasingly depend on. [link](#)
