

Hi all,

Here's what you folks might find interesting today.

I do not see any paper entries listed under **hep-ph**, **hep-ex**, or **stat.ML** in the material you sent, so I cannot write the paper-specific **TOP PICKS** summaries yet.

TOP PICKS

hep-ph

No papers provided.

hep-ex

No papers provided.

stat.ML

No papers provided.

If you paste the selected papers for each category with **title, authors, abstract, and ideally arXiv link**, I can turn them straight into the final digest body in the requested format, with: - grouped **TOP PICKS** by topic, - 5-6 sentence personalized summaries, - relevance framed for **Aritra** and **Jingjing**, - starred-author callouts where applicable, - and Mattermost-safe Markdown.

Back tomorrow with more!

P.S. In the most recent submission window: hep-ph: 0 papers hep-ex: 0 papers stat.ML: 0 papers
