

Virtueller Rundgang durch den LHC

Teil 2: LINAC2

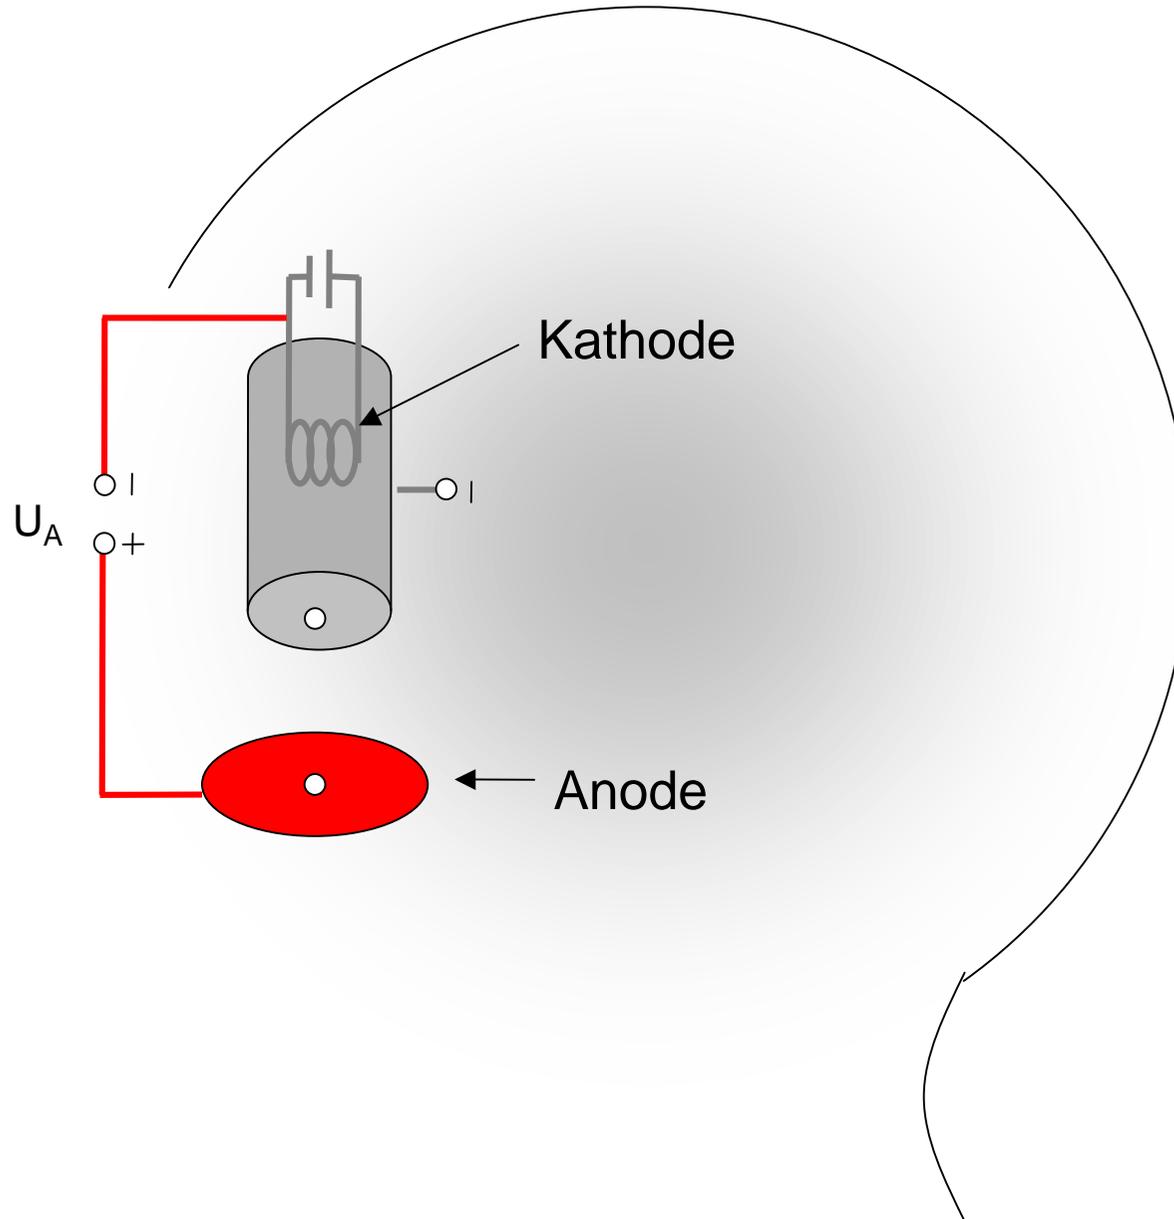

A long, brightly lit tunnel containing a large orange particle accelerator structure, likely LINAC2, with various pipes and equipment visible. The structure is composed of many segments and is surrounded by a complex network of pipes, cables, and mechanical components. The tunnel is clean and well-maintained, with a polished floor that reflects the overhead lights. The perspective is from the end of the tunnel, looking down its length.
