### Title of Posters

	<b>Name</b>	<b>Title of Poster</b>
1	Ghanaatian, Mohammad	1- Quark-Gluon Plasma Model and Origin of Magic Numbers 2- Investigation of the Ds1 structure via Bc to Ds1 transitions in QCD
2	Khanpour, Hamzeh	The N <sup>3</sup> LO non-singlet QCD analysis of structure function based on associated Jacobi polynomials
3	Moosavy, Seyed Ahmad	Kinematic fitting with two constrains and extraction top quark
4	Moshaii, Ahmad	Simulation of Resistive Plate Chamber Based on Transport Equations
5	Roodi, Najme	Study of the Top Quark Anomalous Wtb couplings using the Top Electric Dipole moments
6	Salimi, Narges	Search for SUSY in top final states at CMS
7	Taghavi-Shahri, fatemeh	Non-Singlet spin structure function in valon model
8	Taheri Monfared, Sara	Measurement and QCD Analysis of the Diffractive Parton Distributon Functions
9	Tazik, Naghmeh	Study of Top Quark FCNC using Top and Charm Quarks electric dipole moments
